SUPPLEMENTAL DATA & RESPONSES

**DUNBARTON TELEPHONE COMPANY
FIVE YEAR SERVICE IMPROVEMENT PLAN
JULY 1, 2016 PROGRESS REPORTS**

EXECUTIVE SUMMARY

On July 1, 2014, Dunbarton Telephone Company ("Dunbarton" or "the Company") submitted a five year service improvement plan as required by 47 C.F.R. §54.202(a). Dunbarton operates a single exchange in rural New Hampshire. Consistent with 47 C.F.R. §54.313(a)(1), the Company now submits its second progress report which reflects activities through December 2015.

At the time the five year service improvement plan was submitted, broadband service was defined as a service with speed of 4 Mbps downstream and 1 Mbps upstream. The FCC's action to change this definition to 10 Mbps downstream and 1 Mbps upstream upon reasonable request was not reflected in the initial plan. This report provides an assessment of the Company's achievements to date in network investment to target the new, higher download speed requirement.

UNIVERSAL SERVICE SUPPORT / INVESTED

¹ Allocation in compliance with reporting requirement addressing how federal USF was used by the Company per 47 C.F.R. § 54.313(A)(1).

SERVICE CERTIFICATION

As set forth in 47 C.F.R. § 54.313(f)(1)(i), the Company hereby certifies that it is taking reasonable steps to provide upon reasonable request broadband service at actual speeds of at least 10 Mbps downstream/1Mbps upstream. This service offers latency suitable for real-time applications, including Voice over Internet Protocol. Usage capacity is reasonably comparable to comparable offerings in urban areas and that requests for such service are met within a reasonable amount of time.

SERVICE PROGRESS - EXCHANGE MAP

Funds received from the universal service support mechanisms, in combination with all other revenue streams will allow the Company to maintain and upgrade the existing broadband network. In the July 1, 2014 five-year plan, the level of 4/1 broadband availability within Dunbarton was less than 5%. This figure is now 9.4%. The map below shows the Dunbarton Telephone Company study area exchange boundaries and highlights the areas within which broadband is available.

RATES AND RATE STABILITY

New customers are provided rate information at the time they order service. The rate information is prepared based on tariffs which are on file with the state public utility commission and available for inspection at our office. In addition rates are available on the company website. Notices of rate changes proposed by the Company are communicated to the customers through a bill notice or other comparable means. The Company complies with all state and federal rules applicable to rate changes.

PROVIDE SPECIFIC DISCLOSURES IN ADVERTISING

In advertising of prices for service plans the Company will disclose material charges and conditions related to the advertised prices and services. This notice will provide the potential customer with , including if applicable and to the extent the advertising medium reasonably allows: (1) whether nonrecurring installation charges would apply; (2) the monthly fee associated with the service; (3) whether any additional taxes, fees or surcharges apply; (3) the terms and conditions related to receiving a product or service for "free;" and (4) whether prices or benefits apply only for a limited time or promotional period and, if so, whether any different fees or charges will apply for the remainder of the contract term.

TRUTH-IN-BILLING

The Company has long maintained compliance with the FCC's Truth-in-Billing rules as set forth in 47 CFR 64.2401. In part, this requires the Company's telephone bill must: (1) be accompanied by a brief, clear, non-misleading plain language description of the service or services rendered; (2) identify the service provider associated with each charge; (3) clearly and conspicuously identify any change in

service provider; (4) contain full and non-misleading descriptions of charges; (5) identify those charges for which failure to pay will not result in disconnection of the customer's basic local service; and (6) provide a toll free number for customers to call in order to lodge a complaint or obtain information.

Customers' bills will distinguish (1) monthly charges for service and features, and other charges collected and retained by the carrier, from (2) taxes, fees and other charges collected by the carrier and remitted to federal state or local governments. The Company will not label cost recovery fees or charges as taxes.

PROVIDE READY ACCESS TO CUSTOMER SERVICE

Customers and potential customers may access customer service by visiting the Company's office or by using a toll-free telephone number during normal business hours. Customer service contact information is available at our business office with regular hours posted on the storefront. In addition, this information is available online and on the monthly invoice rendered by the company.

ABIDE BY POLICIES FOR PROTECTION OF CUSTOMER PRIVACY

The Company complies with all state and federal rules regarding the privacy of customer information. Certification of this compliance is provided annually to the FCC.

RESPONSE TO CONSUMER INQUIRIES AND COMPLAINTS RECEIVED FROM GOVERNMENT AGENCIES

The Company will respond in writing to state or federal administrative agencies within 30 days of receiving written consumer complaints from any such agency. Should the agency require a shorter interval for response, the Company will use its best efforts to expedite the review of the complaint to provide a response which meets the agency-provided target date.

TERMINATION OF SERVICE

The Company follows the state public utility commission's rules for termination of service.

Service cannot be terminated without advance notice to the customer. If service is being terminated for non-payment, the customer will have the option to establish a payment plan. So long as the customer adheres to the payment plan, service will not be disconnected.

Customers may terminate service at any time and for any reason. The Company does not assess any termination penalty and the customer is simply required to pay for the services which were used while the service was provided.

Company	Dunbarton Telephone Company
Study Area Code	120043
Supplemental Data For:	Line 610 – Description of Functionality in Emergency Situations

As an initial point, the Company had no service outages during 2015 which met the FCC's threshold for reporting into the Network Outage Reporting System ("NORS").

The Company engages in preventative maintenance programs which help ensure network reliability in all conditions. This includes regular checks on generators, battery back-up, HVAC infrastructure at central office switches, and tree trimming/removal when trees have the potential to take down telephone lines during events of high wind or heavy snow. Access to critical infrastructure (like central office switches) is limited to essential personnel. Spare equipment is maintained in inventory.

Like most local exchange carriers, the Company's network consists of electronic switching equipment and a network of fiber optics and copper facilities. From a switching standpoint, the Company has one primary switch and smaller switches which are fed by the primary switch. These smaller switches are often referred to as intraexchange remote switches or concentrators. The largest threat to switches is the loss of power. To address this, the Company ensures adequate battery back-up is maintained. For emergency situations which extend beyond the useful life of the battery back-up, the Company uses generators to power the switches. These generators are portable which ensures they can be relocated to any switching center based on the specific needs of each switch. In addition, the Company's office will serve as a Command and Control center. This center is included as a primary location to which continuous power is required.

In cases of emergency, the Company's management has contact information for all employees. Depending upon the scope of the emergency, the Company may call-in as many employees as necessary to provide continual telecommunications service. The Company has access to local and regional construction companies which can be called in to supplement the work force if necessary. When poles are down from emergencies, the Company works with other utilities attached to the same poles to expedite the repair or replacement of the infrastructure.

In summation, the Company takes preventative measures to plan for emergency situations and also takes steps to mitigate the risk or duration of such events.
